

The Water & Sewer Advisory Committee shall advise the BCC in the promulgation of rules, regulations and policies related to Water Resources. The Advisory Committee shall review and advise in the preparation of long-term water supply plans and wastewater treatment plans for the County. The Advisory Committee shall review and advise in the preparation of short term programs (five year) and annual programs for water supply, wastewater treatment and reuse. The Committee should continue to become knowledgeable in evolving water supply and wastewater treatment technology. Specific assignments for the Committee are:

1. Be involved in planning for the Integrated Water Plan.
2. Annual review of the five year Capital Improvement Projects for Water Resources.
3. Review progress on major projects.
4. Review projected water, sewer and reuse capacity rates.
5. Continue discussions with the Stormwater Environmental Utility Advisory Committee and the Air & Water Quality Protection Advisory Board regarding re-alignment.
